Title Index

A Microorifice Uniform Deposit Impactor (MOUDI): Description, Calibration, and Use, 14:434
A Numerical Study of the Effect of a High Aerosol Concentration on Impactor Performance, 14:157
A Technique for Controllable Vapor-Phase Deposition of 1-Nitro[^{14}C]pyrene and Other Polycyclic Aromatic Hydrocarbons onto Environmental Particulate Matter, 14:210
A Turbulent-Brownian Model for Aerosol Coagulation, 14:201
An Automated, Semicontinuous System for Measuring Indoor Radon Progeny Activity-Weighted Size Distributions, *dp*:0.5-500 nm, 14:82
An Ultrafine Aerosol Condensation Nucleus Counter, 14:48

Bipolar Charge Distributions of Aerosol Particles in High-Purity Argon and Nitrogen, 14:358
Bipolar Diffusion Charging of Particles in Noble Gases, 14:66

Calibration, Intersampler Comparison, and Field Application of a New PM-10 Personal Air-Sampling Impactor, 14:380
Calibration of a TSI Model 3025 Ultrafine Condensation Particle Counter, 15:107
Coincidence in Time-of-Flight Aerosol Spectrometers: Phantom Particle Creation, 14:112
Considerations in the Accuracy of a Long-Path Transmissometer, 14:459
Counting Efficiency of an Improved 30-Å Condensation Nucleus Counter, 14:278
Cyclone Optimization Based on a New Empirical Model for Pressure Drop, 15:135

Determination of the Condensation Accommodation Coefficient of Sulfuric Acid on Water-Sulfuric Acid Aerosol, 15:93
Diffusion Deposition on a Fiber in Nontransverse Flow, 14:224
Direction of Fluid Flow and the Properties of Fibrous Filters, 15:179

Effect of Flow-induced Relative Humidity Changes on Size Cuts for Sulfuric Acid Droplets in the Microorifice Uniform Deposit Impactor (MOUDI), 14:266
Elastic Flattening and Particle Adhesion, 15:239
Electrodynamic Focusing of Charged Aerosol Particles, 14:389
Electrohydrodynamic Pressure of the Point-to-Plane Corona Discharge, 14:193
Estimating the Variance in Solutions to the Aerosol Data Inversion Problem, 14:348
Experimental Characterization of Chain-Aggregate Aerosol by Electrooptic Scattering, 14:74
Experimental Study of the Outside Vapor Deposition Process, 15:69
Experimental Study of Thermodiffusiophoresis By Use of a Thermal Diffusion Cloud Chamber, 14:406

Filtration of Ultrafine Chain Aggregate Aerosols by Nuclepore Filters, 15:30
Flow Measurement and Efficiency Modeling of Cyclones for Particle Collection, 15:8

Generation and Characterization of Ultrafine Chain Aggregate Aerosols, 15:19
Generation of Uniformly Sized, Charged Particles in a Vacuum, 15:256

Indoor Radon Progeny Aerosol Size Measurements in Urban, Suburban, and Rural Regions, 15:170
Influence of Turbulence on the Deposition Rate Constant of the Unattached Radon Decay Products, 14:257
Interparticle and Particle-Surface Gas Dynamic Interactions, 14:418

Laboratory Testing Method for PM-10 Samplers: Lowered Effectiveness from Particle Loading, 14:93
Low-Cost Virtual Impactor for Large-Particle Amplification in Optical Particle Counters, 15:208

Measurement of Ambient Aerosols by the Differential Mobility Analyzer Method: Concepts and

Realization Criteria for the Size Range Between 2 and 500 nm, 14:5
Measurement of Mass Transfer Agglomerate Aerosols, 14:447
Measurements of Aerosol Particle Size: Improved Precision by Simultaneous Use of Optical Particle Counter and Nephelometer, 14:289

On the Performance of the Berner Low Pressure Impactor, 14:33
On the Settling Velocity in a Nonstationary Atmosphere, 14:247
Optical Properties of Organic-based Aerosols Produced by Burning Vegetation, 14:331

Particle Deagglomeration and Reentrainment in a PM-10 Sampler, 14:165
Particle Deposition in Cyclic Bifurcating Tube Flow, 14:302
Particle Deposition in Cyclic Converging Tube Flow, 14:322
Particle Impaction in Axially Symmetric Supersonic Flow, 15:49
Particle Transmission Characteristics of an Annular Denuder Ambient Sampling System, 14:102
Performance of TSI 3760 Condensation Nuclei Counter at Reduced Pressures and Flow Rates, 15:228

Rate of Unipolar Charging of Ultrafine Thin Platelets, 15:184
Research Needs in Aerosol Processing, 14:316

Sedimentation of Fibers from Laminar Flows in a Horizontal Circular Duct, 14:343
Shadow Effect and Filtration Efficiency of a Granular-Bed Filter, 15:217
Simultaneous Determination of Refractive Index and Density of an Evaporating Aqueous Solution Droplet, 15:201
Some Candidate Replacement Materials for Dioctyl Phthalate in "Hot Smoke" Aerosol Penetrometer Machines, 14:233
Spectroscopic and Solubility Characteristics of Oxidized Soots, 15:112
Stage Response Calibration of the Mark III and Marple Personal Cascade Impactors, 14:365
Submicrometer Aerosol Mass Distributions of Emissions from Boilers, Fireplaces, Automobiles, Diesel Trucks, and Meat-Cooking Operation, 14:138

Tagging In-Stack Suspended Particles from a Coal-fired Power Plant with an Enriched Isotopic Tracer, 15:191
The Grazing Collision Angle of Aerosol Particles Colliding with Infinitely Long Circular Cylinders, 15:149
The Motion of a Charged Particle in an Electrodynamic Chamber, 14:127
The Motion of a Charged Particle in an Electrodynamic Chamber Under Feedback Control, 15:1
Theoretical and Experimental Particle Size Response of Wafer Surface Scanners, 14:177
Theoretical Study on the Stability Characteristics of a Quadrupole Cell, 15:127
Thermophoresis in Gases at Small Knudsen Numbers, 15:77
Thomas Gary Dzubay, 15:214
Tracing the Sources of Indoor Aerosols Using Evolved Gas Analysis, 14:25

Ultrafine Particle Generation at High Liquid Flow Rates with Commercial Two-Fluid Nozzles, 15:156
Unipolar Diffusion Charging of Aerosol Particles at Low Pressure, 15:60

Wear Particle Generation in Thin Film Computer Disk Drives: Experimental Study, 15:36
